Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

1. Claims 10 and 20 are objected to because of the following informalities:

The phrase "in fact" used twice in each of these claims is objected to as indefinite and unnecessary. The phrase should simply be deleted from the claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 3, 5, 8-11, 13, 14, 16, and 19-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Oba et al (previously cited by Applicant; newly applied).

See especially figures 1-3 which show the inner and outer radial faces, the recess which receives the clip, the serration 33 and the flowed lateral sides of the weight body.

With respect to claims 3 and 14, the weight body is not shown to be arcuate, but in lines 27-31 of column 2 and lines 42-44 of column 4, the weight body is described as being arcuate to contact the rim flange of the wheel.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oba et al.

Oba et al discloses a radially extending portion 30c on the clip which includes recesses or serrations 33a, and engages the first guiding portion 16 of the weight. The material of the weight body is caulked into the serrations. Only one serration is shown on each side of the radially extending portion of the clip.

Those of ordinary skill in the art would have found it obvious to provide a plurality of serrations 33a in the side of the clip of Oba et al as this is merely a multiplication of parts, and the result of providing better gripping of the weight by the clip is predictable.

Response to Arguments

6. Applicant's arguments with respect to claims 1-3, 5, 8-14, 16, and 19-22 have been considered but are moot in view of the new grounds of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show additional wheel balancing weights.
